PROJECTS

- **QR Code Generator (Python):**
Created a script to generate UPI payment QR codes for PhonePe, Paytm, and Google Pay using user input. Demonstrates use of Python and qrcode library for real-world digital payments.

- **To-Do List App (HTML, CSS, JS):**
Built a responsive app to add, edit, delete, and mark tasks with date/time. Focused on DOM manipulation and clean UI.

- **Calculator App (HTML, CSS, JS):**
Developed a responsive calculator with keyboard/mouse support and input validation using JavaScript.

- **Quiz Game (HTML, CSS, JS):**
Designed a quiz app with multiple question types and score tracking. Emphasized interactivity and responsive layout.

- **Multi-Page Website (HTML, CSS, JS):**
Created a responsive website with sticky nav bar and scroll effects. Built using only vanilla front-end technologies.
