

## VINAYAK C KANAVALLI

Bangalore, Karnataka, India

+91 7338440272 | vckanavalli@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

### Profile

---

Computer Science undergraduate skilled in Python, Django, SQL, and scalable systems using REST APIs. Experienced in debugging, data analysis, and developing secure applications following SDLC and Agile practices. Solved 260+ LeetCode problems with Global Rank 8061.

### Education

---

|                                            |               |
|--------------------------------------------|---------------|
| <b>BE Computer Science and Engineering</b> | 2023–2027     |
| SJB Institute of Technology, Bangalore     | CGPA: 9.21    |
| <b>Class XII</b>                           | 2023          |
| SPSM PU College                            | Score: 90.66% |
| <b>Class X (ICSE)</b>                      | 2021          |
| Rainbow Residential Public School          | Score: 85.1%  |

### Technical Skills

---

- Languages: C, C++, Java, Python
- Web: HTML, CSS, JavaScript, Django, REST APIs, MySQL
- Core: DSA, OOP, OS, Computer Networks
- Tools: Git, GitHub, VS Code, CI/CD basics
- Soft Skills: Communication, Teamwork, Problem Solving, Adaptability

### Projects

---

|                                                                                                                                                                                                                                                                                                                                                                                                             |             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Parking Management System</b>                                                                                                                                                                                                                                                                                                                                                                            | (Team) 2025 |
| <ul style="list-style-type: none"><li>• Designed and developed a scalable parking management system using Django following SDLC principles</li><li>• Implemented REST APIs for slot tracking, user authentication, and real-time parking availability updates</li><li>• Optimized backend logic and debugging processes to improve system reliability and performance</li></ul>                             |             |
| <b>DailyX Blogging Platform</b>                                                                                                                                                                                                                                                                                                                                                                             | 2025        |
| <ul style="list-style-type: none"><li>• Developed a scalable micro-blogging platform using Django and MySQL supporting secure user interactions</li><li>• Designed and optimized relational database schemas improving query performance and data retrieval efficiency</li><li>• Implemented REST APIs and secure CRUD operations ensuring stable backend integration and application reliability</li></ul> |             |
| <b>QR Code Generator</b>                                                                                                                                                                                                                                                                                                                                                                                    | 2024        |
| <ul style="list-style-type: none"><li>• Developed a web-based QR code generator for secure and efficient data encoding using Python</li><li>• Optimized encoding algorithms to reduce processing time and improve application performance</li><li>• Ensured cross-platform compatibility and reliable output for real-world usage scenarios</li></ul>                                                       |             |

### Experience

---

|                                                                                                                                                                                                                                                                                                                                                                          |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Web Development Intern – SkillCraft</b>                                                                                                                                                                                                                                                                                                                               | Jun 2025 – Jul 2025 |
| <ul style="list-style-type: none"><li>• Developed scalable web applications using Python, HTML, CSS, and JavaScript following SDLC practices</li><li>• Collaborated in an Agile environment to integrate frontend and backend components efficiently</li><li>• Debugged and optimized application performance improving system reliability and user experience</li></ul> |                     |

### Achievements

---

- 260+ LeetCode problems solved
- Achieved Global Rank 8061 in a Leetcode contest
- 5 star Problem Solving and 4 star Python and C (HackerRank)

### Certifications

---

- Problem Solving & Java & Python Basic – HackerRank
- Intro to ML – Kaggle
- Web Dev Internship – SkillCraft
- Business 2 Business, Human Computer Interaction – NPTEL
